REBECCA HUNT

MSc Software Engineering
Student

EDUCATION

2023 - 2024
MSc Software Engineering
Cardiff University

I am currently a student on Cardiff University's MSc Software Engineering course. The program covers coding languages like Java and Python, building a solid foundation for software development, providing experience with both Front and Backend development, whilst also delving into DevOps practices. I have become adept at applying these languages in real-world projects, enhancing my problem-solving skills through on hands-on experience. Additionally, the course delves into agile methodologies, equipping me with the ability to work collaboratively, adapt quickly, and deliver high-quality software solutions in dynamic environments. This comprehensive approach ensures that graduates are not only well-versed in coding languages but also adept at agile practices crucial for modern software development. Taking projects from the initial client meeting, to final production and presentation, I feel that I have gained solid skills to take me forward into the tech industry.

2015 - 2017
Croesyceiliog Comprehensive
GCSE's and AS Levels

2017 - 2018
Access to Nursing
Coleg Gwent

2018 - 2022
BSc Medical Sciences
University of South Wales

EMPLOYMENT

ONBOARDING AGENT
STARLING BANK

2023 - Present

I currently work as an Onboarding Agent at Starling Bank as a member of the Personal Current Account onboarding team. We process applications, review customer documentation, assess fraudulent activities and access & review credit data. This role requires a keen eye for detail, the ability to work efficiently and work well within a team. A large element of this role includes problem solving, as many applications can be unique and provide new challenges for the onboarding team, being able to problem solve, collaborate with colleagues, and seek out answers is paramount.

WORK EXPERIENCE

JUNIOR PRODUCT EXECUTIVE
NEARMENOW LTD
2024 - Present

Following a successful client project during my Masters, I and my development group were offered part-time roles by the client, providing invaluable work experience. In this capacity, we engaged with clients, developers, and industry professionals, representing the company as Junior Product Executives. Our responsibilities included utilising tools like Jira for task management and communication with developers, alongside contributing ideas for codebase improvements and further development. Notably, I was selected to speak on behalf of NearMeNow Ltd at The Senedd AI Small Business Panel organized by Google and Cwmpas.
