REBECCA HUNT

MSc Software Engineiog

MSc Software Engineering
Cardiff University

EDUCATION

I have obtained Cardiff University's Software Engineering Masters degree. The program covered a variety of programming languages, both Front and Backend development, and also basic DevOps practices. I have become adept at applying these languages in real-world projects, enhancing my problem-solving skills through on hands-on experience. Additionally, all projects followed agile methodologies, equipping me with the ability to work collaboratively, adapt quickly, and deliver high-quality software solutions in dynamic environments. This comprehensive approach ensures that graduates are not only well-versed in coding languages but also adept at agile practices crucial for modern software development. Taking projects from the initial client meeting, to final production and presentation, I feel that I have gained solid skills to take me forward into the tech industry.

Onboarding Agent | Bereavement Support Specialist
Starling Bank

EMPLOYMENT

I worked as an Onboarding Agent at Starling Bank as a member of the Personal Current Account onboarding team. Processing applications, reviewing customer documentation, and assessing fraudulent activities. This role required a keen eye for detail, the ability to work efficiently and work well within a team. A large element of this role includes problem solving, as many applications can be unique and provide new challenges for the onboarding team, being able to problem solve, collaborate with colleagues, and seek out answers is paramount. Following this role I moved into a Specialist position within the Bereavement Support Team.

Junior Product Executive
NearMeNow Ltd

WORK EXPERIENCE

Following a successful client project during my Masters, I and my development group were offered part-time roles by the client, providing invaluable work experience. In this capacity, we engaged with clients, developers, and industry professionals, representing the company as Junior Product Executives. Our responsibilities included utilising tools like Jira for task management and communication with developers, alongside contributing ideas for codebase improvements and further development.

Notably, I was selected to speak on behalf of NearMeNow Ltd at The Senedd AI Small Business Panel organized by Google and Cwmpas.

I am a quick learner and passionate about my work. I am ready and excited to learn and look forward to taking the next step in my career.
